

Technical Data Sheet

SlowSetta Expose

Product	SlowSetta Expose is a surface set retarding agent for exposed aggregate. This product is especially designed to be applied undiluted. Always stir or shake well before use.
Usage	To expose aggregate of concrete.
Coverage	Approximately 7 sq mtrs per litre, depending on amount of exposed aggregate desired.
Package	20lt pail.
Storage	<ul style="list-style-type: none">• Store in cool dry area and out of direct sunlight.• Keep pails closed when not in use to prevent slimming.
Shelf Life	Approximately 18 months, providing stored correctly and unopened.
Handling	<ul style="list-style-type: none">• Manual handling without due care could result in personal injury.• Avoid contact with skin and eyes.• Avoid breathing vapours.• Wear suitable protective clothing.
Properties	Appearance: Colour liquid Soluble in Water: Complete
Equipment	Airless spray unit. To clean equipment use water.
Caution	Always stir or shake well before use. DO NOT apply SlowSetta Expose in very hot weather – crusting of the surface will occur when SlowSetta Expose has evaporated. If sprayed onto brickwork or other material, wash off immediately to avoid staining. DO NOT wash off onto any adjacent concrete previously poured.
Application	Apply SlowSetta Expose with a pump spray only. Spray over the concrete as soon as the bleed water has evaporated from the surface. Apply a moderate and even coat for a medium exposure of aggregates. For a deeper expose, lightly broom the surface after the first coat. Care should be taken not to expose aggregate too deeply, causing aggregate loss or dislodgment. Then apply a second coat of SlowSetta Expose. Once concrete has taken set, hose off with a wide nozzle spray or water jet. A high pressure adjustable water unit is recommended.
